

About Us

Who We Are

Located in Southern Indiana, Daviess County Metal Sales has been serving the area since 1983, and has grown to become one of the largest building material suppliers in the area. At our site in Cannelburg, Ind., we manufacture our own metal sheeting, cut-to-the-inch, and wooden trusses, up to 100 feet clear span. We also stock a full line of building materials. This allows us to provide our customers with the materials they need at the prices they can afford. We specialize in pole buildings but can help you build many types of structures, such as portable buildings, garages, houses, churches, and commercial buildings.

Looking for a building designed with just the right customizations? Contact one of our experienced salespeople and have him or her provide you with a price generated by our custom computer quoting system. Construction of the building on your site is also available!

Contact us for more details via the contact page, email: info@dcmetal.com, call us at (800) 279-4299, and let us know what we can build for you!
